

This is the main page of the dashboard that tracks recent activity on the BI DevOps board, showing new tickets in the last 15 days and the usual average for this value.

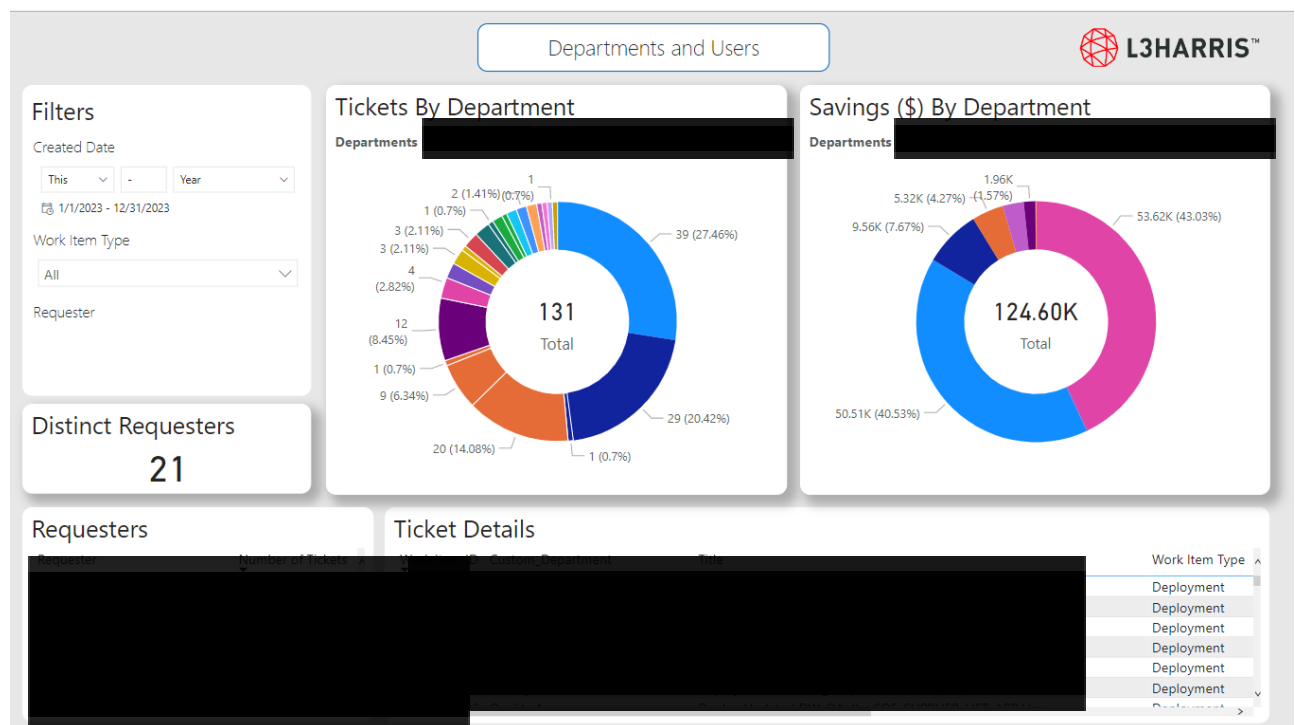

This page of the dashboard shows the number of items in the filtered date range along with the proportion of work item types.

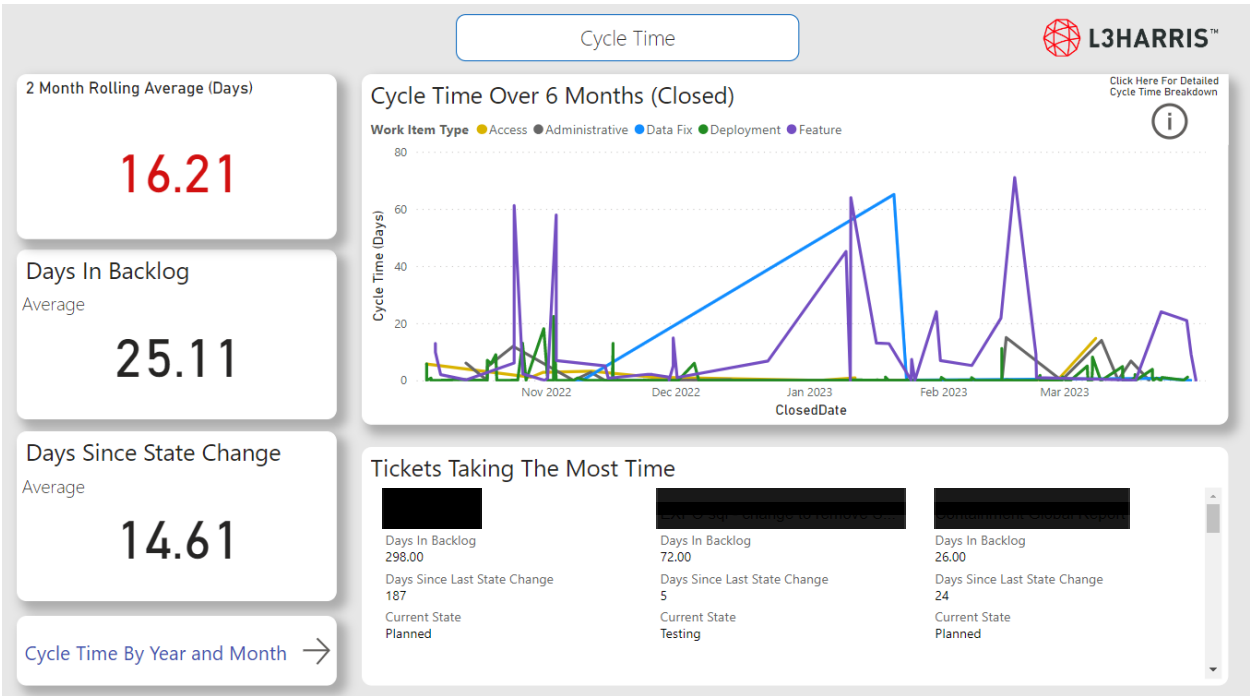

Clicking the quick hits gauge on the previous page will lead you to this page that outlines more details about quick hits.

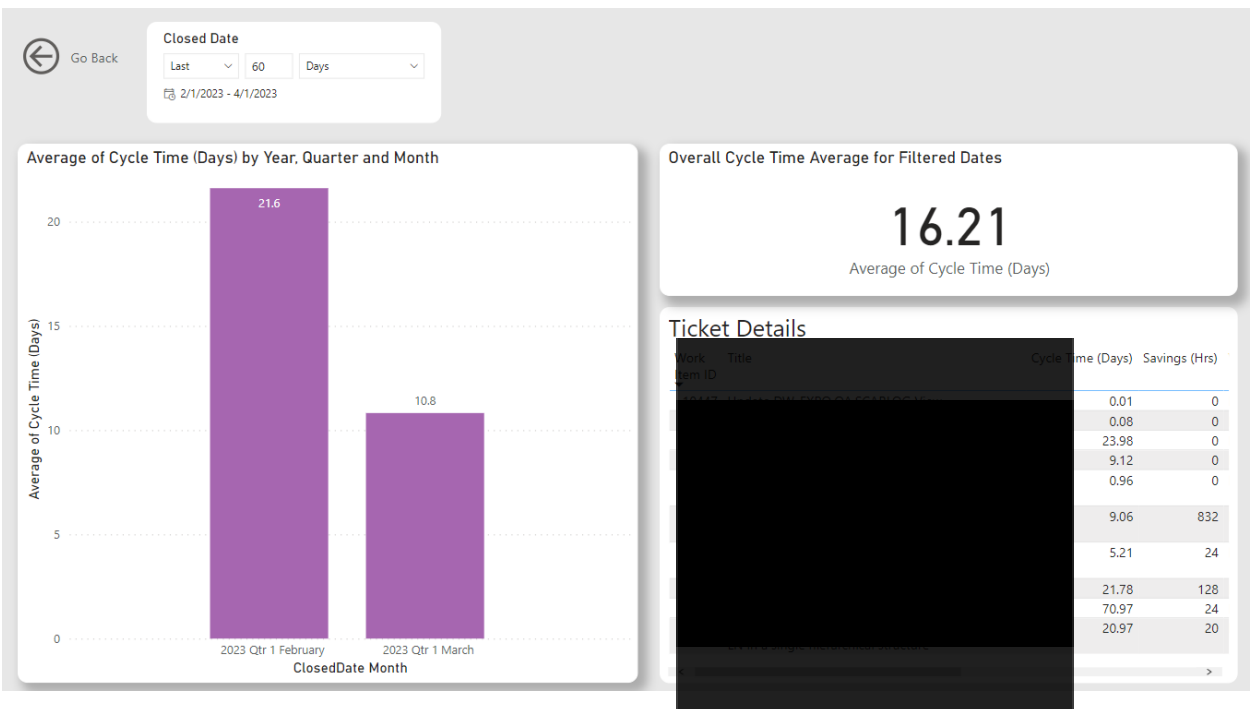

This page shows you details about the different departments and how they're using BI.

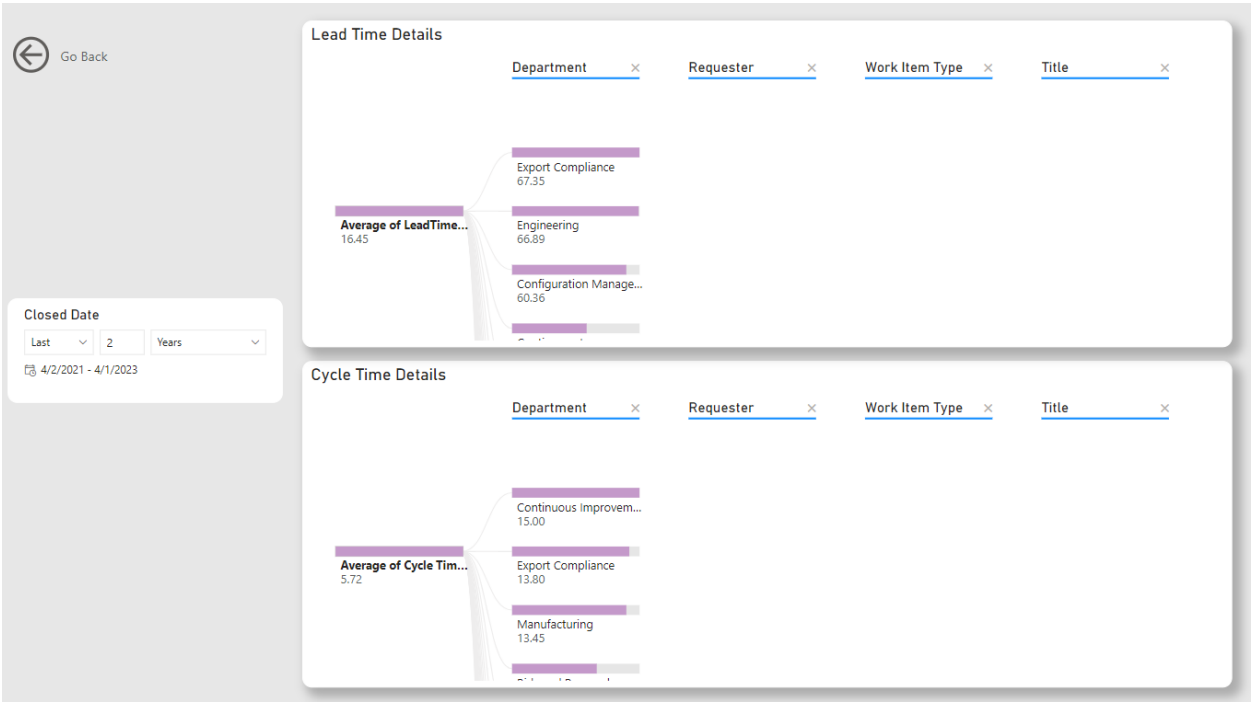

This page shows you details about the cycle and lead time of the team including the key metric, a 2 Month Rolling Average.

By clicking the Cycle Time By Year and Month button on the cycle time page, you get to this page that outlines details by filtered periods.

By clicking on the Info Button on the cycle time graph, you see this page where you are able to see cycle time by department, requester and work item type.

This final page shows you the state of the current board (tickets not closed).
